32nd International Symposium on Remote Sensing of Environment

"Sustainable Development through Global Earth Observations"

June 25 to 29, 2007
Hotel Ramada Plaza Herradura
San José, Costa Rica

The Symposium

The Symposium will address the nine societal benefits defined by the Group on Earth Observation (GEO) as well as related topics dealing with remote sensing technologies and education.

The Venue

The Symposium will be convened in the newly renovated International Convention Center of the Ramada Herradura Hotel, conveniently located between the Juan Santamaría International Airport and the City of San José, Costa Rica.

Papers & Posters

Presentations by experience from around the world will present their latest research on the following topics:

- *Disasters
- *Human health
- *Climate
- *Weather
- *Water cycle
- *Ecosystems
- *Biodiversity
- *Agriculture
- *Energy

Exhibits

Exhibitors in the private and public sector will have the opportunity to exhibit their newest products and announce their latest innovations and technological developments to one of the most significant gatherings of the remote sensing community.

Workshops

Various workshops on remote sensing analytical techniques and applications will take place on the weekend before the symposium on a first-come, first-served basis.

Tours

Arrangements will be made for a variety of tours before, during, and after the Symposium to experience the forests, beaches, volcanoes, hot springs, wildlife and other attractions in Costa Rica.
