GBM Mobile integrates with MapInfo Exponare

Now you can manage your mobile operations across the web through MapInfo Exponare. Transfer data and field edits between Windows Pocket PC devices and your central database through the Exponare Server.

GBM Mobile for Exponare integrates field and office operations to provide a true enterprise level solution to all your field mapping and asset management operations.

MapInfo Exponare Add-on

Exa-Min has fully embraced Exponare as a delivery platform for a new generation of mapping solutions. As explained by Exa-Min director Ken Moule, "We have enjoyed working with the Exponare team and are excited about MapInfo's new product direction. Our team is now working on wireless communications with the PDA and integrating third party applications through the Exponare interface".

"MapInfo welcomes the value that Exa-Min adds to the Exponare Suite of products" said Damien Cassin, MapInfo Product Manager. "The GBM Mobile Integration demonstrates the flexibility of both products, and how they can be complementary in addressing an organisations requirements".

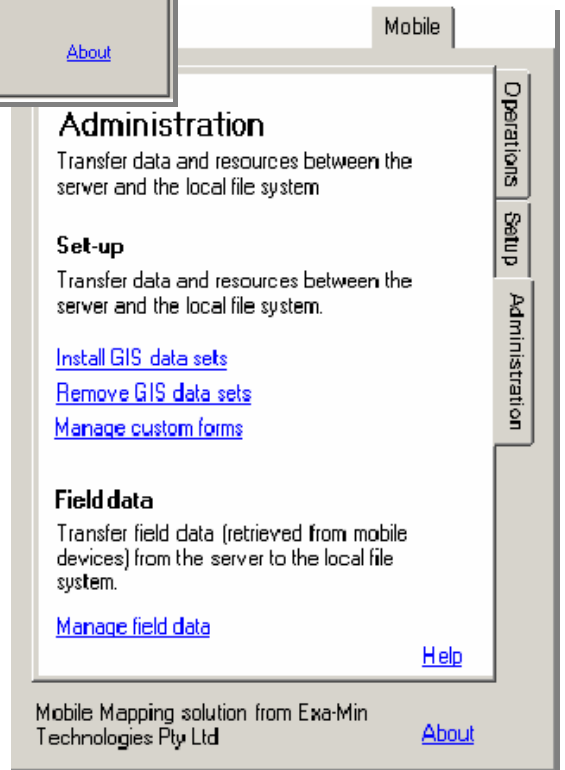

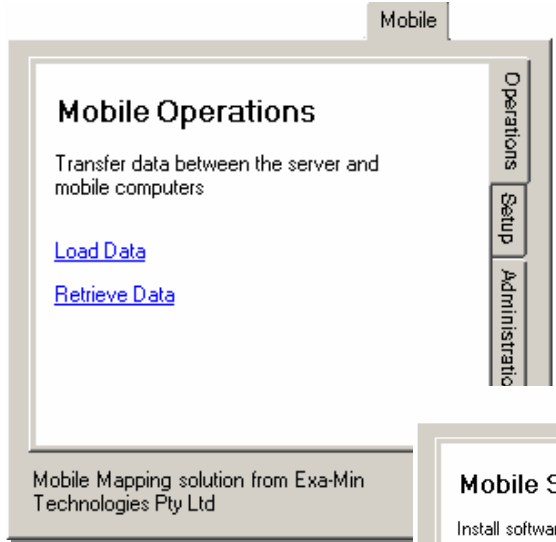

Contact Exa-Min for additional information or to arrange a 30 day evaluation
